

Let's help keep the bathing waters of **Porth** and **Newquay** clean for everyone.

Only **pee**, **poo** and **paper** should be flushed down toilets. Anything else can cause blockages, sewer flooding and pollution in our seas. You can help: only put the **3Ps** (pee, paper and poo down the toilet and no **FOGS** (fats, oils and greases) down the sink. Please **bag and bin** anything else.

Sewage in the sea affects bathing water quality. It contains bacteria, viruses and chemicals harmful to both humans and wildlife. It is estimated that 100,000 marine mammals and 1 million sea birds are annually killed by marine plastic pollution!

If you love the sea and use the coast, please help us protect it for the future and follow the 3Ps - thank you.

# BIN IT. DON'T FLUSH IT.

Only flush **pee**, **paper** and **poo** down the loo!

## Have you seen the yellow fish on drains and manholes?

The Yellow Fish mark surface water drains which are connected to the river or sea.

Only rain should go down these drains – anything else will pollute.

Oils, paints, solvents, chemicals or dirty water down highway gullies or surface drains will enter rivers and damage your environment.

**REMEMBER: Only Rain Down the Drain!**
